

Bring in the natural light with

Leaf

Experience the latest lighting innovation from D-tec featuring SunLike LED technology. Natural light with a high Colour Rendering Index (CRI) and a unique technology that reduces blue light. This light not only enhances your environment but also your well-being, by providing a more natural and healthy illumination. By using the colour stripe, you can choose between a range of colour options that helps to create the perfect atmosphere in the room.

Monitor mount

Enhance your patient experience with our innovative monitor mount. By integrating a monitor, the door to a world of possibilities opens. Ideal for displaying digital X-rays and camera images, each visit becomes more interactive and informative.

Natural, dynamic light

Experience natural daylight with our dynamic lighting system, creating a seamless transition from warmer to cooler colour temperatures, replicating natural light changes.

Leaf thin and glare-free

Leaf's unique light panel with laser-engraved leaf pattern provides even and efficient light distribution, enhancing workplace environment and ergonomics. Together with the integrated microprisms, shadowing is minimized, making Leaf more than just a light source – it's an artwork that transforms every room into a haven of light and design.

Sustainable and economical

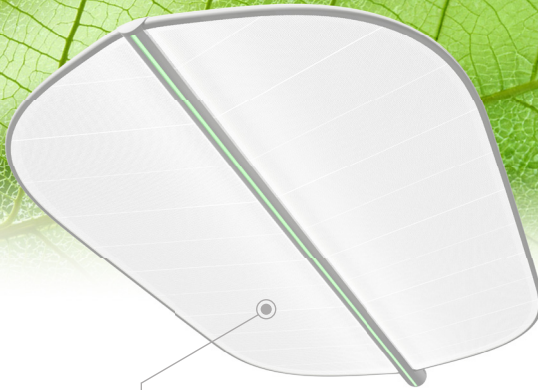

Our energy-efficient lighting system offers significant energy savings and a long lifespan, providing both environmentally friendly and cost-effective illumination.

SunLike LED lightning

With SunLike technology, we offer a light that closely mimics natural daylight. With a high Colour Rendering Index (CRI) and technology that reduces blue light, we promote better health, increased productivity, and improved sleep quality.

Handmade
In Sweden

Product	L 168
Light source	LED 168 W
Brightness	3000 LUX/1.2 m. 14000 lm
Colour temperature	CRI 98
Dimensions	1190 x 638 x 51 mm
Weight	12 kg
Optional features	Indirect light Dynamic light Monitor mount

About D-TEC

Since our company was founded in 1989, we've been steadfastly committed to providing workplaces with the finest lighting solutions. Our vision has always been to offer businesses of all sizes the utmost quality in modern lighting technology.

We manufacture and develop our lighting in Sweden, striving to replicate the world's best light source - the sun. We firmly believe that a well-lit workplace not only enhances ambiance but also contributes to increased productivity and well-being for everyone spending time there.

With our extensive experience in lighting manufacturing, we take pride in illuminating workplaces across various industries worldwide, and we continue to produce our lamps in Nossebro, located in western Sweden.
